Education

Full Stack Certification
CareerFoundry | Online
2022

Bachelors of Science in Computer Science, Digital Art Track
Minor in Mathematics
DeSales University | Center Valley, PA
2019

Executive Summary

Dedicated, dependable Web Developer with a wide range of skills to help advance a company's mission through technology and innovation. Influential communicator skilled at building relationships with team members, clients, managers, and other departments; strategic-minded leader with success in project development and innovative problem solving; and broad experience in areas including web development, programming, data analysis, automation, design, and digital media. Successful track record of setting priorities, shaping processes, and developing methods to achieve targeted goals while focused on integrity and service with the ability to work independently or collaboratively to achieve shared success.

Full Stack Projects

myFlix App

Oct 2022

An Angular app that allows users to be able to register to the app where they can find information of a certain movie and add it as a favorite or remove it from the favorite list. Users can update their information and be able to delete their account if they want to. The API was built using mongoDB and hosted through Heroku.

Meet App

June 2022 - Aug 2022

A React app where users can find events happening around the world with the use of Google Calendar's API. The app was built and tested using the Test-Driven Development, mainly Puppeteer and Jest.

Professional Experience

ENGINEERING INTERN

2021 - 2022

Systech - Princeton, NJ

Tasked with supporting advancement of engineering projects through generating and ingesting large testing datasets, continuous integration, quality assurance, automation, and integrating new tools.

- Manage and catalogue large volumes of product labels and barcodes
- Implement unit and manual tests for existing functionality
- Stand up new tools to support engineering projects and processes
- Execute development projects using Python and Linux
- Develop methods for advancing automation in Quality Assurance activities

BRAND PROTECTION INTERN

2020-2021

Systech - Princeton, NJ

Charged with supporting sales and project staffs for one of the leading Brand Protection technology companies supporting the Pharmaceutical, Healthcare, Wine & Spirits, Beauty, and FMCG markets.

- Created working inspection solutions, such as vision inspection stations to capture bar code e-fingerprint signatures in packaging and authenticate on mobile devices to ensure functioning designs and solutions
- Reviewed incoming application surveys by determining the scope, technology, and other specifications of the potential project
- Produced pre-sale and active project inspection evaluation reports
- Maintained organized, secure, and documented vision evaluation lab and sample storage area
- Managed database to enable relevant stakeholders to monitor evaluation progress
- Received, evaluated, tracked, and disposed of customer samples
- Assisted with creation of pre-configured standard solutions to access and apply for future applications

DISNEY COLLEGE PROGRAM MERCHANDISER

2019

Walt Disney World - Orlando, FL

Interacted with customers and represented high standards through safety, courtesy, efficiency, and show.

- Delivered excellent customer service interacting and communicating effectively with customers by answering both park and merchandise related questions, pin trading, and demonstrating merchandise
- Operated a cash register for cash and credit card transactions

Accomplishment:

- o Awarded Courtesy and Efficiency keys, 2 of the 5 keys of Disney World
